
Combined Use of Neurotoxins (BoNTA) and Dermal Fillers for Facial Enhancement: Advanced Techniques

Activity Overview

The course will include extensive hands on injecting experience in best practices and latest, most innovative injecting techniques for global facial rejuvenation and sculpting.

Target Audience

This activity has been designed to meet the educational needs of physicians, physician assistants, nurse practitioners, registered nurses and dentists involved in delivering non-surgical facial rejuvenation cosmetic procedures to patients.

Learning Objectives

Upon completion of the educational activity, participants should be able to:

- Review evidence-based basic injection techniques as well as introduce evidence-based alternative injection techniques of routinely injected treatment sites to their practice.
- Apply evidence-based principles and techniques for optimal facial enhancement for injecting BoNTA and dermal fillers to injection sites not previously injected.
- Be able to recognize and implement appropriate treatment protocol of potential adverse events at treatment sites not previously injected.

Criteria for Success

Statements of credit will be awarded based on the participant's attendance and submission of the activity evaluation form. A statement of credit will be available upon completion of an online evaluation/claimed credit form at <https://akhcme.com/akhcme/pages/aai>. You must participate in the entire activity to receive credit. If you have questions about this CE activity, please contact AKH Inc. at tbrignoni@akhcme.com.
